Live online webinars

Take any of these quick and targeted training courses from the comfort of your own desk. They last about an hour with time for Q & A. You can interact with the instructor, and get the most out of the products you already have.

Past attendees rave about the track series! Hear what a few had to say:

"Not only did you explain the nuts and bolts of website construction, but you offered information from your own experiences, and that is what kept us all coming back."

"The XSite class and the product are amazing. To be able to have a fully-functioning website capable of handling orders that looks professional in under 30 minutes is great. Your instruction on how Google™ operates, customizing your website and offering individual critiques was invaluable."

"I like the track format -- this enabled us to build off the previous day and really understand how our site can benefit us and close more deals."

Can't make it to a live session?

Visit www.alamode.com/training see a full list of recorded sessions you can watch anytime, for free.

Questions or suggestions?

We're always looking for new class suggestions, and new ways to improve our training. So your candid feedback is much appreciated. Feel free to e-mail us at training@alamode.com.
